

Cloud Support | DevOps | Cloud Engineering

Malolos, Bulacan, Philippines | jeysibn@gmail.com | linkedin.com/in/jeromeibon | github.com/Jeysibn

Professional Summary

Computer Engineering graduate and OCI-certified engineer building production-style cloud and Kubernetes infrastructure from provisioning through GitOps delivery and observability. Brings enterprise SaaS technical-support experience and is pursuing entry-level Cloud Support, DevOps, and Cloud Engineering roles.

Technical Skills

Cloud: Azure, AWS, Oracle Cloud Infrastructure, VMware vSphere, Proxmox

Delivery: Terraform, GitHub Actions, Argo CD, Git, YAML

Containers: Kubernetes/k3s, Docker, Helm

Observability: Application Insights, Log Analytics, Prometheus, Grafana

Systems: Linux, Windows Server, Active Directory, TCP/IP, DNS, VPN, SSH, RDP

Experience

Technical Support Engineer, Endpoint Security SaaS | TrendAI | Aug 2025 - Feb 2026

Resolved 80+ enterprise technical cases across network, system, and cloud infrastructure issues while working within SLA expectations.

Provisioned AWS environments including EC2, VPCs, security groups, subnets, and routing to reproduce customer scenarios.

Completed 640 hours of training across enterprise networking, server administration, VMware vSphere, Azure fundamentals, and AWS fundamentals.

IT Helpdesk Intern | Philippine Transmarine Carriers | Mar 2025 - May 2025

Assisted with Active Directory accounts, user access controls, network connectivity, VPN troubleshooting, endpoint redeployment, and IT assets.

Projects

Cloud-Backed Portfolio: React, TypeScript, Azure Functions, Cosmos DB, Terraform, GitHub Actions, Application Insights.

Homelab GitOps Environment: k3s, Argo CD, Terraform, Proxmox, Helm, GitHub Actions, Prometheus, Grafana.

Education & Certifications

Bachelor of Science in Computer Engineering | National University Baliwag | Aug 2021 - Aug 2025

Oracle Cloud Infrastructure Foundations Associate | Trend Vision One Server and Workload Protection Professional | GitHub Foundations
